

Make your Mark

PHOTO PRINTS

Let's talk about why you need a Photo Print

- ✓ capture a memory or moment
- ✓ gift of any nature
- ✓ fill an un-used frame
- ✓ grab attention in public places
- ✓ sell creative work for extra income
- ✓ decorate your personal spaces
- ✓ make a mark indoors

Your mark is custom-built for YOU

We'll make the size whatever you tell us. For the best value, choose one of the sizes we offer.

YES, you can order just one, but if it's a beautiful image, order more. You'll be glad you did.

Best of all, our glossy photo print paper is printed by the professionals at Dprint, so you don't have to worry if your mark will last.

With care (see "caring for your mark"), you can expect color brilliance basically forever if used indoors. If you aren't planning to frame, we recommend lamination to prevent water and fingerprint damage. Whether you are framing or not, consider asking us to mount the print onto durable board.

Using your Mark

Un-laminated photo prints are best framed. If you choose to laminate, you have purchased a versatile product that can be displayed in many ways, and the easiest thing to do is purchase it with an easel. Ask us about other options if you're not sure.

Caring for your Mark

Keep your print out of direct sunlight and heat. If your print is laminated, you can wipe it with a damp cloth occasionally to remove dust. That's as easy as it gets. If your print is not on display, store it in a cool and dry space and be sure to protect the corners by inter-leaving your print(s) with over-sized card stock.
